RE: Notice of Data Breach

Dear <<first_name>> <<last_name>>:

I am writing to you on behalf of Performance Food Group, Inc. (“PFG” or the “Company”) with important information about a data security incident that occurred at PFG. PFG takes the protection and proper use of your personal information very seriously. We are, therefore, contacting you to explain the incident and provide you information about security measures you can take to protect yourself and your personal information.

What Happened:

On June 21, 2023, PFG’s information technology team discovered that, beginning on May 16, 2023, a Company email account had been compromised and used by an unauthorized individual to send large quantities of “phishing” emails. PFG then engaged a professional forensic investigator and working with that team, identified several more accounts that appeared to be accessed without authorization. The forensic investigator provided an initial report on October 9, 2023 regarding the personal information that was contained in the involved accounts. Unfortunately, we did not have current mailing addresses readily available for some people that were identified in that report. To date, our records indicate that we did not have an accurate address for you when the initial notifications were sent. Since then, PFG has continued to work both internally and with an outside vendor to identify current addresses for each of the impacted individuals. Our vendor identified this address for you on November 8, 2024. This notice was not delayed as the result of a law enforcement investigation.

What Information Was Involved:

So far, there is no evidence that any personal information was exfiltrated or otherwise removed from PFG’s servers but it does appear that the unauthorized individual had access to it. PFG has no indications that any of the data has been used for fraudulent purposes, nor are we aware of any resulting identity theft, fraud, or financial losses. Personal information potentially disclosed as a result of this incident included your: <<b2b_text_1 (data elements)>>. Again, while we do not know whether your personal information was in fact accessed or used for any unauthorized purpose, we are sending you this notice as a precautionary action.

What We Are Doing:

Throughout the remainder of 2023, we took steps to mitigate the incident, including successfully locking out the unauthorized users from the Company’s system and undertaking a full forensic investigation of the incident.
