**Subject:** Re: Public Record Request - Support in dissolving Act 250 LVRT – 10 day and Acknowledgement of request

AOT Public Records Manager:

Thank you for your reply to my request for public documents. I wish to provide clarification about the scope of my present request for documents.

I do not request a proverbial " documents dump" involving any and all documents leading to the decision by each of the three state entities to enter into the settlement agreement with VAST. Nor do I want to incur substantial fees for the costs to the State in locating and providing documents.

I am interested in and request the essential document produced by each of the three state entities which may be otherwise described as the findings and conclusions of law that serve as the foundation for the decision to enter into the settlement agreement and which provide the legal analyses in support of dissolving Act 250 jurisdiction, diminishing enforcement under the terms of the existing land use permit and conceding complete federal pre-emption.
