

# Earth Day Today

I'm going to tell you About Earth Day and why it's important. In my backyard There is a lot of nature But there is a lot of trash on the road which I hate, Because of the earth is supposed to be clean. The Earth is not supposed to be trashed or polluted. The earth is polluted, we will die at the age of 50 Because there is so much trash. Here is my favorite quote "He who plants a tree, thinks of others besides himself" That quote by Dr Thomas Fuller really is my favorite quote.

Smoke is bad for the Earth Because there are particles in the smoke that are not good for the Earth. That's why I wish it was the 1770s when there was not that much smoke. The smoke is bad for the earth. But that's not the only thing that's bad for the Earth, And there's also a lot of trash can pollute. The Earth just as much smoke can. I can't wait for trash day me and my brothers, dad can go pick up all that trash on the side of the road with our side-by-side, We were also picking me out of money on trash day, but money does not matter On trash day. You're picking up trash For fun and to help the Earth because if you don't have the Earth then we will just be polluted forever and our planet Earth will become Planet trash.

My teacher Miss Rosa van wie is Interested Helping pick up trash. She is a very nice teacher and so is Miss Norton. Both of them are very supportive but back to the new topic.

# Bad Biden

Biden is doing something called the willow project, And it's terrible. Biden says that we need more fossil oil for the Earth, he's Drilling for Fossil oil An Antarctica which He is going to make the Antarctica melt 4 times faster Polar bears arctic foxes lemmings reindeer cannot swim for more than 3 or 4 hours So he is probably going to make them all die and we will have no answer to that animals, but I love Antarctica animals so I'm saying put the willow Project to an end. Who doesn't like a cute little baby polar bear who is going to drown in the freezing cold water For a little lemon who doesn't even know how to swim it will just drown automatically or a fox the cute little fox you can't let him down Biden does not know what he's doing, he's he's doing animal abuse He's making all of the animals drown and they didn't even do anything to you. We are animals and they just mind their own personal business. they don't harm you They did absolutely nothing Please stop the room project because you're the animals did nothing when you're harming them so stop the willow project. project stop the willow project. Stop the willow project. It's more important the Earth's population of animals or drilling for fossil oil we can just go back to the 1770s when there was no fossil oil and people actually

cared about the Earth and Antarctica, but Biden obviously doesn't care about Antarctica because he is hurting its relation of animals which if they all go extinct we most likely won't survive. Because when Antarctica melts completely then all of our fish that fishermen kill to eat and all of the whales and fish move up to Antarctica we will not have a lot of fish to eat. and I have a bad feeling that if Biden ruins the arctic we will not survive so Biden if we do not survive it's your fault not mine because

telling you. this is the woman I mean man you are letting **kill** all of the arctic animals. The one I'm saying is stop the willow project please cuz you're going to kill all of us and I don't really want to die at the age of 11 years old Biden if you're reading this please read it

over and over again until you decide not to do the willow project **thanks** and here is a quote that I made "if you hurt animals you also are hurting yourself" and that was by Adrianna Elizabeth Bickford.

## What will help

If you know what to do when there is Earth day right now you do best to help with everything but if you don't you can plant a tree or a seed. A single seed will help the ecosystem. or even go bottle picking that will help to go pick bottle picking and trash picking on the side of the road, Don't buy plastic cups. Buy paper cups. buy paper plates. Don't buy plastic forks or spoons use organic products.
