

EARTH DAY

BY: BARRETT

For earth day if I had ever done it. I would have gone outside and picked up trash. I go on walks down the side of the road and I see trash. That makes me think about our animals and air. In my opinion I think everyone should at least give a thought about trash on the planet. Trash can lead to animals dying off.

If you feel bad I think that's good. You can easily go on a device and find a video about animals. You can feel bad for them but that will not help! If you feel bad enough you will donate or help the cause. In lakes, rivers, and oceans you can find trash, gas, oil and more! For example the ocean, the fish, land animals, and mammals have to drink or live in that water.

The same thing with rivers and lakes. All the animals have to suffer because of us! In the book or the movie the Lorax there are animals that suffer because someone is cutting all the trees down. Even if you throw trash out in space it still is bad for everyone. If we recycled in the first place none of this would have happened! Did you know the author has a famous quote by Dr. Seuss It goes

"I am the Lorax. I speak for the trees". In my opinion the Lorax should be read or watched by kids and adults. The people that do look into it and try to find the quote will find it. Now let's talk about climate change. Climate change is a huge part in Vermont's heat problem. The winters are getting shorter. So basically the heat is rising. The animals have to face the weather and extinction! The sad thing is that they have to face it alone because of us.

My opinion is that overall I think more people should start joining groups that want to help the Earth and environment. Also I want to thank the people that already try to help the cause. Also did you know the YouTuber Mr. Beast is having a donation for trash getting taken out of the ocean where if you donate one dollar to Team Seas they will take one pound of trash out of the ocean. Also Mr. Beast is hosting a donation called Team Trees so for every dollar that gets donated him and his team plants a tree.
