

Earth Day Essay

By Emma [REDACTED]

Vermont has had a lot of trash on the ground lately. So I'm going to write about Vermont and Earth day.

What do I like about Vermont? I have been living in Vermont most of my life. I personally love the mountains, lakes, and animals. I also love the sky when it's pink. Every chance I get I will take a picture of the environment.

In the spring I like to go biking. I really like to go around this loop in my neighborhood. It starts at this pull over spot. The road is right up after that. Up a little hill is a daycare. Then up a bigger hill is a garage. Then down a big big hill is another garage. Then up one more little hill is the end of the loop. According to Alltrails Delaware and Hudson rail-trail is 10.2 miles. Also, according to All trails the Delaware and Hudson rail-trail is "Forest, rivers, and wildflowers". It has a lot of trees and water. It is a dirt trail. It also is a walking and running path. I would like to go there to bike sometime.

Earth day is an important day to me. Earth day is important because the Earth is special and fragile. The Earth embodies a persona. So i feel like Earth day is a good idea and everyone should celebrate Earth day because if the Earth wasn't here where would you be. The earth is one out of seven planets. You should treat the earth like you would treat any other planet.

I feel like people should help others clean the Earth up. For example if you see someone cleaning one the side of the road you should help them. I also think that someone should start a cleaning business. Not a regular cleaning business, a side of the road cleaning business. You send everyone to a different county for the day and they clean that county the most they can that day. The next day they go back and clean that county more. Each day they go back and clean till they finish cleaning that county.

I keep Vermont's environment clean by if I see trash when I'm walking I will pick it up. When I'm at school I will pick it up especially since grades 6,7,8 have snacks outside and their trash doesn't always make it inside. It is usually on the ground so I will pick it up. I usually only find 3 pieces of trash a week at school.

My concerns about the future is that animals will go extinct really quick because of our environment. According to WWF the text says "The Amur Leopard is one of the rarest big cats

in the world, with only 100 individuals left in the wild population seems to be stable and increasing, these leopard subspecies still critically endangered since 1996. Amur leopards can only be found in a relatively small region of the far east of Russia and northeastern China". Also, according to WWF hawksbill turtles are going extinct. In the text it says" In the last 30 years, the worldwide populations of hawksbill turtles have been reduced by at least 80% as a consequence of accidental capture in fishing gears, and nesting habitat degradation, and coral reef damage".

Vermont is a beautiful state and that's why I think we should take care of our Earth and also hire people to clean our counties. Also take care of animals so they don't completely go extinct. That's why Earth day is important to me.
