

Earth day Essay

By: Evan

What I think of Earth Day is when people wake up. They feel like they want to help the earth and pick up millions of pesos of trash on the sides of the road. Also People clean in the woods.

Today I saw a big piece of thin plastic in the woods on the playground. I thought about the earth and I ran to it. Then i put it on a fence until recess was over. Then I grabbed it and brought the thin plastic to my teacher for a mat for painting.
