

Earth Day Essay

According to Kiddle "earth day was founded by gaylord nelson as an environmental teach-in first held on april 22,1970" i believe it should have been made earlier if it was the planet would be in better shape.littering started littering before ancient rome and greece heck even the ancient mayans.trash is very easy to find.

My next topic is that earth day is starting to fade do to technology people are more concerned about high scores and winning.i remember i have missed so many earth days because of call of duty and fortnite/video games.the earth is more polluted than it was back in the years 500 Bc all the way to 1'000 Ad combined.

A Lot of people think it is no big deal but it builds up if you look on the side of the road and look at all the cigarette butts plus the smoke pollutes the atmosphere.The atmosphere is made to trap air but it traps smoke too.

Inconcltoin we need to clean more our planet is dying we have to help it if our planet dies we

die with it so stop playing games and smoking please clean.if the planet dies
than plants will die, than animals ,and last us we will starve and I do not want to starve or die.
