

Earth day!!!!

BY MASON 

Take care of trash because we hate trash so bad and it's smelly. It's so stinky and no one needs trash because people can die from it making them sick. No one likes trash and I hate it. Earth doesn't like trash. It should go as far from Earth as possible. We need to keep the environment safe and clean so no one smells the trash and dies from the trash. We hate the trash so we recycle the bottles and take care of the trash. We help the environment stay clean and let the Earth have fun being clean, so we have no more trash on Earth to pick up. We like the environment to be clean so we don't have stuff to pick up.

I read an article about kids making robots to pick up trash in the pool.

The kids were making a robot to pick up trash to help the environment.
