

My Vermont Essay

By Quinn

Hi, I'm Quinn and this is my essay about my life in Vermont and the things I love to do in the different seasons. I've lived in Vermont my whole life. I've enjoyed many moments and disliked very few of them. One of my favorite things to do in Vermont during the winter is to go skiing. I have been doing it since I was two years old. To me winter is a big part of Vermont because of how beautifully the snowflakes fall. There are many things I enjoy about my life in Vermont during the winter time. I'm very fortunate because in the winter time I have access to many activities like skiing, basketball, snow-mobiling, and prepping for our sugaring business. Sometimes I can get sick of the cold and the snow being around for as long as it's around for. But with the coldness and the snow around I can continue with the things I do in the winter time. Before I go to bed in the winter I love to look out the window and see the falling snowflakes and the tall mountains.

There are also many things I love to do in the summertime. Similar to the winter, I love to waterski. A Lot of times in the summer we go out to a reservoir with some friends on our boat. We got a new pair of water skis last summer so that's when I learned how to water ski. As soon as I got up I wanted to go water skiing every single day. That's one of the reasons that I don't like winter because there's no water skiing but then again it gets replaced by regular downhill skiing. I enjoy tubing behind our boat as well. Each year we go to lake bamoseen where our family owns two camps. We go with her cousins and we have a great time. This summer we have vacation plans and I'm so excited to go on them. Oh yeah I forgot to mention that our family travels a lot. One of the most obvious things I like to do in the summer is to swim. We used to live in the house with a pond but now we live in a different house. We are thinking about getting a pool at the house we live in now.

It is now time to tell you about the things I like to do in the spring. The main thing we do in the spring is sugar. This year we got a new evaporator so we made more maple syrup. One day we made 650 gallons. Spring is

also when my birthday is which is in May. Another reason I like spring is because it is lacrosse season and I get to play a lot. I play for the st.j rec team in 5/6. We live in a house that is surrounded by Fields so we can go dirt biking and four wheeling all spring.

The reason I like fall is mostly because of the Fall Foliage. I think it's beautiful and it brings a good vibe to each one of our days in the fall. Another thing I like about the fall is that it's soccer season. My dad normally coaches my team along with my best friend's dad. But the thing I like most about the fall is our halloween tradition. Every year we go on a hay ride in the peachum Village and go trick or treating. After we go trick or treating we go to one of our friends houses and we trade our candy. Another important thing about fall is that my mom, two of my dogs and my brother all have birthdays in the fall. By the way my mom and my dog Harvey have the same birthday. You might have noticed I said "Harvey" well that's my dog's name he's named after the lake. I also have a dog named Burke who is named after the mountain. And last but not least we have a dog named Basil. We chose that name because we thought it was beautiful just like Vermont's beautiful seasons.

If we work together we can make sure these season's come beautifully every year. I believe it can happen and I hope you do too. On April.22nd I hope that you are going to go outside and make our home even more beautiful than it already is. The reason I am asking for this is because our world is being polluted. One day we were driving to a field trip and I saw so much litter on the side of the highway. The bus stopped for some reason. Me and my friend looked out the window And saw sign that read " 500 dollars for fine throwing trash on highways and streams". Me and my friend thought that it was not right and it should never happen at all. Even if there's hesitation please do not pollute our home. You think it's not a big deal when you do it but then many people do it and it turns into a huge problem. So even if it's one bottle, one can or one bag never pollute our home. Many people work hard to clean our home and all there hard work was destroyed by people who don't care. Make sure that you care and you're not polluting our home. Thank you for reading my essay.

THE END
