Seasons in Vermont

Many people love to play and be outside in our environment! In fact I love to be outside too! I love Vermont's environment and we should clean our beautiful state to keep Vermont beautiful! Vermont can stay beautiful, we just need to keep it clean and unpolluted! If we keep our state unpolluted: the snow in our winters will be white, the grass in our spring will be green, the flowers in summer will be bloomed and beautiful, and in fall our trees will be full in foliage and beautiful! We should keep all the seasons in Vermont beautiful!

Winter:

Winter in Vermont can be beautiful too! If we keep our state unpolluted with pesticides and trash then we will have beautiful winters! Winters are supposed to be beautiful along with every other season! Winters can be beautiful with beautiful glistening glittery snow. With white glittery snow you can do so many fun things! So many fun things like: sledding, tubing, skiing, snowboarding, snowmobiling, building a snowman or a snow fort, having snowball fights. All of these things are what you do with snow. But you might not want to have a snowball fight or build a snowman with snow that's not white or clean. That's one reason we should not pollute and keep Vermont clean and beautiful!

Spring:

Spring in Vermont is really beautiful too, all the flowers and green grass. We can have that every spring just don't litter or pollute! Another amazing thing that happens in spring is baby animals! Baby animals will not survive if the air is polluted because it would be hard to breathe and you need to breathe to live. Also if trash is always on the ground it will be super hard to find food or they might think the trash is food when it's not so they could eat something they actually can't and they wouldn't make it or they could get stuck or tangled in trash and not be able to move. That's another reason why we should not pollute and keep Vermont clean and beautiful!

Summer:

Summer in Vermont is also really pretty, the late nights, bonfires, swimming, etc! It's all really fun and also really warm! But, we can't swim with polluted and trashed waters, we can't have bonfires with polluted air, and we can't stay up all night in the warm polluted air. You can do so much in summer but you can't really do much with pollution because

pollution will prevent lots that you can do! That's another reason why we should not pollute and keep Vermont clean and beautiful!

Fall:

Fall in Vermont is super pretty too! Especially fall because of the leaves and foliage! Fall has really pretty foliage: the red, orange, and yellow! Fall is also a really cool temperature! I love fall! Fall is my favorite season because of the colors and the weather! I also love all of the things you can do in fall: Apple picking, corn mazes, apple cider, and halloween! If the air is polluted all of those activities won't be really fun because the air would be polluted! That's another reason why we should not pollute and keep Vermont clean and beautiful!

In conclusion as said before we should keep Vermont clean and unpolluted because: Every season can be really beautiful such as winter, spring, summer and fall! All the seasons will be really pretty and fun if we keep our Vermont unpolluted! This is why we should keep Vermont clean!
