When setting the price of medicines Alexion, AstraZeneca Rare Disease aims to reflect its value to patients, to payers, and to society in general as well as the cost of research and development (R&D). Alexion's pricing decisions are based on many factors that reflect our commitment to patients, global macroeconomic realities, and the US Healthcare System as well as our obligation to shareholders. We are mindful of healthcare costs and are working to explore innovative opportunities and solutions working with others in the US Healthcare system to deliver innovative medicines while considering cost and value. Importantly, the WAC or list price is rarely the price paid by an individual patient as it does not account for a series of factors, including individual insurance plan design, provider access, assistance programs or savings offers.
