Description of the marketing and pricing plans used in the launch of Herceptin Hylecta – 600mg (5mL) Inject Sol in the United States and internationally:

Marketing activities that support the launch of a new medicine are designed to raise awareness and understanding with healthcare providers and - in some cases - patients about the approved indication(s), efficacy and safety data contained within the medicine's FDA approved label.

We take decisions related to the prices of our medicines very seriously. When determining pricing, we consider a number of factors including: how well the medicine works and how it compares to other available treatments; the financial resources required to continue discovering new medicines for people with serious diseases; and how to ensure that the price doesn't prevent our medicines getting to people who need them.

Herceptin Hylecta – 600mg (5mL) was not granted breakthrough therapy designation or priority review.

The estimated volume of patients who may be prescribed Herceptin Hylecta – 600mg Inject Sol (5mL):

Genentech does not publicly disclose the estimated volume of patients who may be prescribed Herceptin Hylecta - 600mg (5mL) Inject Sol.

The date and price of acquisition if the drug was not developed by the manufacturer:

Herceptin Hylecta - 600mg (5mL) Inject Sol was not co-developed or acquired from a third party.

Sincerely,

Maria Aquilina
Director, Government Programs
