Earth Day

Do you like biking, soccer, or running? I personally really like those things. These three things are how I enjoy Vermont's environment and everyone else should too.

Biking

Biking is really fun especially when the roads and grounds are the perfect texture. I always like to bike in my woods and at the railroad. I went biking and I got to see all the beautiful flowers on the trail and got a free workout. That is one of my favorite activities to do in Vermont's environment.

Soccer

Soccer is also a fun sport, if you play soccer you would know that the grass you're playing on must be perfect. I played soccer during summer and I fell down, but it didn't hurt because the grass was soft. That is another thing I like to do in Vermont's environment.

Running

Running is another sport I love to do. Running can be an adventure because if you go in the woods you can see all the different colors and sounds. I run in the woods and around my house. Those are the three activities that I like to do in Vermont's environment.
