Subject: RE: further response to public record request

Ms. Mishaan,

Below is a further response to Sarah London's letter regarding my public records request.

Dear Ms. London,

Thank you for your generous response and the records provided. I have three follow-up questions:

1. With regard to the records produced pursuant to the remand of *Toensing v. Attorney General*, are there more records to be produced or is the production complete?
2. You note that you "post all public record act requests, cost estimates, and productions on our website." But I only see those for requests beginning in 2017. Are productions from requests before 2017 posted? How do I get these?
3. One aspect of my letter that you did not address is that I had requested materials disseminated to the public such as those utilized in the public presentations. These cannot possibly involve any privilege, and thus do not require any work beyond copying or simply making them available for my inspection. I asked for these records to be identified and made available for my examination.

Thank you for your attention.

Sincerely,
Dean Corren

Dean Corren
