Re: Docket ID EPA-HQ-OEM-2015-0725; RIN 2050-AG95
Submission of U.S. Chemical Safety Board Report on Philadelphia Energy Solutions Refinery Accident

Dear Administrator Wheeler:

The undersigned Attorneys General hereby submit the U.S. Chemical Safety Board’s (CSB) preliminary investigation results, dated October 16, 2019, regarding the explosions and fire at the Philadelphia Energy Solutions (PES) Refinery.\(^1\) We cited the PES accident, which occurred in June 2019, in our supplemental comments dated August 20, 2019, as further evidence that EPA should abandon its proposed rollback of the Accident Prevention Amendments.\(^2\)

In our supplemental comments, we noted that it was uncertain at the time whether any of the highly dangerous hydrofluoric acid had been released during the explosion. The CSB’s report states that in a mere two minutes, over two tons of hydrofluoric acid – a chemical that is immediately dangerous to life or health at 30 parts per million – were released from a broken pipe during the accident, forming a ground-hugging vapor cloud that ultimately triggered the explosions at the refinery. The CSB findings make clear that PES and the City of Philadelphia avoided catastrophic loss of life by the narrowest of margins and further underscore the need for EPA to implement the aspects of the Accident Prevention Amendments requiring better coordination with emergency responders, improved incident investigations, third-party auditing, and safer technology and alternatives analysis. See Supp. Comments at 15-17.

---

We request pursuant to Clean Air Act section 307(d)(4)(B)(i) that EPA add this letter and the CSB report to the rulemaking record. See 42 U.S.C. § 7607(d)(4)(B)(i) (“All documents which become available after the proposed rule has been published and which the Administrator determines are of central relevance to the rulemaking shall be placed in the docket as soon as possible after their availability.”).

Respectfully submitted,

LETITIA JAMES  
Attorney General of New York
