

Mountains

By Nisha [REDACTED]

March 5, 2021

Mountains are so beautiful it's very high and it's dangerous but people still go to the mountains to see the view and it's very beautiful but people bring food and some people throw them in the mountains and it's bad to throw things like trash, plastic, chips pack, bottles, and many other things. Some people make a warning signs to stop throwing things but peoples don't stop throwing it. IF this not gonna stop mountains will look like a trash and peoples won't be allowed to come see the views. Pollution is a thing that can make the whole world in the problem and the important thing is the mountains and the trees in the mountain. If they keep on cutting the trees and the trees on the mountain the world will look so bad without trees or mountains that's why do not throw trash or cut the trees.
