Brownington Central School
Sixth grade

Vermont is a beautiful place. I have lived in Vermont all my life. Parts of my family are from Massachusetts. My mom was born in Massachusetts then moved to Vermont before she had my older sister.

I love how when it's winter time in Vermont the snow sits on the tree branches then falls off and looks like it's snowing. I also like how the sun hits the snow and it sparkles.

My favorite season is Fall because it has nice weather. It's not too hot and not too cold. I love how in fall it's so beautiful, I love watching the leaves fall off the trees. My family sometimes eats outside on our back deck for lunch or dinner. Some outside activities we like to do include going to parks like the one at my school sometimes, playing basketball with the hoop we have in our yard, and making leaf piles.

Some of my favorite places in Vermont are the Old Stone House. I love going to the old stone house because it's educational but fun. I have gone there on class field trips 2-3 times. It's fun! Another place I like to go is Willoughby lake. During the summer my brother, sister, nephew and I love to go swimming there. Before they closed, my favorite restaurant was Everybody's restaurant in Lyndonville Vermont. My older brother worked there for 13 years until recently when he had to get a new job.

I love going places in Vermont with my family and friends. My family used to love going to the movie theater before covid hit. We also like to go to the lookout tower at the old stone house museum. We went to the lookout tower on the 4th of July last year (2021). Right before covid hit we took my friend to the movie theater for my birthday. We had so much fun. We watched the movie Onward.

Earthday to me is a day to help the planet and clean up outside a bit. Sometimes my family likes to take trash bags and go walk along the side of the road and pick up trash.

I think we should be more cautious about what we throw away and what we recycle. We could turn a cereal box into a nice birdhouse, or anything you can think of it to be. One of the things my family does to help the environment is we cut the plastic bottle holders so animal life can't get their heads stuck in it.

That is what I love about Vermont/I think we could do better in Vermont.
