## **Introduction**

It's my opinion that people should start recycling more. You can help by putting plastic water bottles in the recycling so it can be reused and made into new things and then that will be recycled and be reused again.

## **Reason 1**

Things you can recycle are plastic, cans, boxes, cardboard, paper bags and paper. If you recycle paper it can be made into new paper and you can reuse cans and more. You can get a recycling bin sometimes it is blue sometimes it is green you can put a recycling bin in so many places you can get a big bin so when your little bin gets full you put it in the big bin so when waste collectors come and take the big bin and pour that in another bin it's a big sickle .

## **Reason 2**

Recycling is better for the world because it makes the earth look clean and healthy. It is important to help the earth, then the earth will help you grow more food. And the pollution rates aren't as high and that's my second reason why I think recycling is better for the world.

### **Reason 3**

I love recycling. It's fun. It feels like you got something done on that day . If you don't recycle there are a lot of things that can go wrong like animals can get plastik in their throat from trying to eat them animals don't know the difference so that a reason why you should recycle

### **In conclusion**

Its good to recycle so the world can be clean and healthy. next time you have a can you put it in the recycling.
