

Braedyn

5th grade Brownington Central School

I love Vermont because it has a lot of trees,birds,and fish. There's a lot of good things to do outside in winter,summer,fall and spring. In summer you can go boating, swimming , fishing, gold panning and a lot of other stuff. In winter you can build snowmen,build igloos and you can have snowball fights, you can go ice fishing and more fun stuff. In fall when the leaves fall you can rack them up and they will pill up and then you can jump in them. In spring you can go hiking,fishing,gardening. You will catch a lot of perch but then you can have a fish fry. I enjoy Vermont because there are a lot of places where you can go when you get bored. You have restaurants,movetheters,arcades,Santa's village,water parks,outdoor go karts and more stuff. You have like 6 or 7 holidays, some are really cold and some are really hot. I care about the environment by picking up trash and cleaning up the beaches that have trash on them and also so birds don't eat the trash because they can die and it would be sad. In summer you can go camping. In spring you can tap trees and mack maple syrup for your pancakes. I think earth day means that it's the day that the earth was made. I think the future for vermont is that people will plant more trees and stop killing animals that don't have to like cheetahs because some animals are going extinct and if they go extinct then there will be no more of that animal any more. If you have a good environment then the outdoor sports will stay the same but if you have a bad environment then the outdoor sports will stop. I could protect the environment by cleaning up garbage

and not littering and I would not cut a whole bunch of trees down because birds and other animals live in trees and if we cut a lot of trees down then the birds won't have a place to live. I also love the smell of fresh cut grass and the smell of summer. I love the sound of the birds chirping in the summer. When I wake up in the morning in the summer I love to hear the sound of the birds chirping. I love to go gold panning with my papa. It is a lot of fun. I love to go to the ocean in Maine because it is a vacation and I love to go and find some cool shells and sand dollars they are rare to find on the beach. In winter you can go ice fishing and catch a lot of different types of fish. In spring when it is muddy you can go mudding with four wheelers or trucks it is fun to get stuck. I love to do that stuff with family and friends.
