5th Grade

Here's Vermont.

In Vermont we have all different seasons Winter, Summer, Spring, and Fall. In Winter we have snowmobile trails. Also in Vermont in the Winter we put taps in the maple trees. And in the Fall we have foliage. And have lots of people who come up from other states to take pictures of the beautiful foliage. Also in Vermont we have ATV's and in the Summer we let them ride the roads. In Fall, Spring, and Summer we have mud trails. Also in the Spring we start to get maple syrup because in the winter it is cold and when it starts to warm up the syrup begins to drip and fill the buckets. We also have hunting season in Fall. And in Winter we get tons of snow. It's so cool to have all this snow around us and around Christmas it is fun. And in winter we get tons of snow. It's so cool to have all this snow around us and around Christmas it is fun and it would be weird to have to go somewhere else for Christmas and have no snow. And in the Spring and Summer I can stay outside longer than in the winter and fall because the clocks change.

Also we have maple trees and dirt roads. Maple trees and tapping is a very popular thing around here. We have lots of maple treats. Like Maple cotton candy, Maple ice cream, Maple candies. We also do something called "Sugar on Snow". It is very popular. We also have hunting season in Fall . We hunt deer, turkey, squirrels, and bears.

Here in Vermont we have lakes. One of our lakes is called Willoughby Lake. Over by Willoughby Lake you can see a huge gap between two mountains. And it is actually called the Gap. And by Lake Willoughby I have seen so many bald eagles and I thought it was so cool to see one so close. In Vermont it is not a city it is more like a town. Like we have neighbors but it is not like in a city having some house right next door to your house like in some spots like in Brownington Center we have a few houses right next to each other but most of it is like a house and then farther down the road another house. We also have lots of woods. And also have Farms up here. And those farms produce a lot of the things we have up here. Like milk, eggs , and vegetables. In Newport there is a big fish near Lake Memphremagog. The fish in this

picture is a salmon. It is there because it is a very common to fish for salmon in Lake Memphremagog.

Vermont is very pretty and I get really excited when it is time to get outside and start to clean up on Green Up Day. Even know we have tons of forest and so much garbage to clean up just going down your road and cleaning the sides helps even because you are still helping and it is better to help than not doing anything at all. I also love going outside in the spring and planting flowers and being able to have my window open and feel the nice breeze. One thing that happens when it begins to get colder out at night there is something called dew. Dew is like mist and it gets things super wet and it also gets colder at nights when it begins to get towards Fall and Winter.

One of my favorite things about Vermont is to be able to ride a snowmobile in the Winter on the trails and go farther than your own land. It's so cool to have all this snow around us and around Christmas it is fun and it would be weird to have to go somewhere else for Christmas and have no snow. I also love building snowmans in the winter when the snow gets sticky. In Vermont there are not a lot of people. Vermont is a very small state. Vermont is known for it's mountains and actually called the Green Mountain State. And we have a lot of lakes and ponds. One of my favorite things to do is go to the beach. In Newport we have a lake called Lake Salem and in Westmore we have Lake Willoughby. But in Newport it's like a city because there are buildings and houses clumped up to each other so it's cool to see how much Newport looks like a city so it's cool to see a little bit different from Brownington. Also one of my favorite thing is to have a nice bomb fire and to play with my dogs outside. And also one of my favorite things to do when I am in Lake Willoughby is to go diving down and find clames.
