5th grade

I like that Vermont is not just like a city or a country, it depends on where you live in Vermont. Where I live it's mostly woods, it is very peaceful. I love all the wildlife, their deer and all sorts of animals. But there is hunting. I know you have to kill animals so that there are not too many of the same animals. But I don't like that people kill them because the animals did nothing to them.

In Vermont there are four different seasons. One of the four seasons is winter, is crazy. We get to go snowboarding, snowshoeing, sledding, and snowmobiling and that is not even half of the winter activity that we can do. One of the other seasons is spring. It is really nice in spring. It is not too cold or too hot, it is just wram. The next season is summer. In summer we go camping and we do a lot in summer. I just wish that summer was longer. Next season is fall. I think that fall is the best season. Now I don't have a greenhouse but I want one so I can grow any fruit, vegetables and flowers. I want to grow a lot of flowers and they are so pretty. My favorite flower is lilys. I love that in Vermont you can go camping. That is so fun whether you're in a tent or my favorite camper. I like that you can either go camping in the wild or you can go to a campground. I like to go camping at a campground because you get to meet new people even if you have been to the same place before. People tape trees for money. Maple is a huge part of vermont. There is maple candy and a bunch of maple stuff. It is so good. Where I live we have amish people. We see a lot of horses and buggies down the road. The Amish hang their clothes in the winter it is weird but I like them. We started to compost and I like that composting is helping the earth. On my road we have solar panels and I like that it is using the sun for something to help us. There are a lot of farms and houses. I know

someone that owns a chicken farm and in the winter they kill the chickens. And there are a lot of cow farmers so that means we get a lot of milk. I like to go and feed some of the horses that I know.

I went to this place that had a open tower and the mountains are so beautiful it is the best. I have a side by side I like to go in my backyard and explore. I have like 10 acres of land and I like to explore the woods. I like to go to the beaches. We don't have that many beaches where I live but I still like to go and swim with my gram dog. It is so fun. My favorite thing to do during summer is to go and get ice cream. It is the best. My favorite kind of ice cream is coffee. In the summer I have a fire and look up at the night sky. Sometimes the sky is full of stars and then sometimes there's no stars at all. The state horse is the morgan horse and i have not seen one well i don't think so but i have seen photos there are so pretty i what one. The state bird is a hermit thrush. I think that I have never seen one but they seem very cool. I have only been ice fishing two times and it is pretty cool. I mean I would go again. I used to live in Newport and browington is like a country and I think that Newport is more like a city and I think that it is cool that 30 minutes away is like a whole new world. I like going down town there's a feins where they do this cool yearn thing. There are a bunch of stores. It is the best on main street. There are so many ponds that fish can swim in . In spring,summer and fall I like going on walks. I like the seeneren espasley in fall my mom likes to go for walks.
