

Have you ever been to Vermont? If so, you've probably seen how beautiful it is and the amazing environment. This is what I love about Vermont's environment, seasons, lakes, forests, mountains, and the animals.

I love the seasons in Vermont, the winters are cold and full of life, the summers are hot but enjoyable, the fall is refreshing and beautiful and the spring is muddy and fun. I love winter because of all the amazing things you can do, skiing, sledding, sugaring, and building snowmen. I also love all the animals in the winter, but best of all I love the view of the snowy winter mountains. The deer, bright red cardinals, brown and black bears, I love watching all the animals in the winter. I also love the summers, I love going swimming, going for bike rides, and going on vacation with family and friends. I love being able to walk outside and play with my friends, you can even have a bonfire. The fall is very beautiful, I love watching the squirrels climb up the trees and taking walks with my family. I love the beautiful leaves changing colors and their bright, warm colors. The springs are muddy but I love playing outdoors with my family and friends. That is what I love about the seasons in Vermont.

I also love the lakes in Vermont. I love swimming in the lakes with my family, friends and even my dogs. There are a ton of different lakes in Vermont, like lake Champlain and lake Carmi. I love fishing, tubing, and even just relaxing hearing the waves crash against the shore. Every time I go to the lake I smell the fishy seaweed smell. I love how beautiful the lakes are in Vermont, the shiny reflection of the sun and the fish leaping out of the water. If you have ever been to Vermont, what's your favorite thing about the lakes in Vermont?

The forests in Vermont are the most beautiful and peaceful thing, I take a walk in the woods when I want to relax. I also love the birds singing. I love how many animals are in the forests. In the fall the trees are even more beautiful, their colors are amazing, bright, and warm and full of life. Did you know that the biggest forest in Vermont is the Green Mountain National Forest. If you haven't seen the amazing forests in Vermont, come to Vermont and see them.

Vermont isn't called the Green Mountain State for nothing, our tree covered mountains are amazing. Our tallest Mountain is Mount Mansfield. There's many other mountains here in Vermont, like Camel's Hump, Killington Peak, and Jay peak. Jay peak is known for its wonderful skiing. There's no better hiking than in Vermont. The scenery is beautiful and breathtaking. I love hiking because of all the nature, trees, icicles, rocks, and stunning views. If you haven't seen the mountains in Vermont, you should come and see them for yourself.

One of my favorite things about Vermont is the animals that live here, Bears, Deer, Fox, Bobcats, wolves, and much more. Did you know that hermit thrushes are our state bird? The hermit thrush is a medium sized, North American thrush, and its scientific name is *Catharus guttatus*. Moose and Whitetail deer live in the forest. There are only two types of wildcats in Vermont, the eastern bobcat and the Canada lynx. Surprisingly, the most dangerous animals in Vermont include deer, ticks, and mosquitoes. Come and visit Vermont to see the incredible animals. One of my favorite animals in Vermont is the Northern Cardinal.

This is what I love about Vermont's environment. The weather, lakes, forests, mountains, and the animals. You might say you know what Vermont is like because you've seen pictures, but pictures aren't good enough for Vermont, you have to come to Vermont yourself and embrace the beautiful nature and environment.
