## Introduction

In my opinion we should start taking care of the earth animals are dying we won't have enough food will all die cause we have no food the waters are being poisoned with toxins and oil spills most oil spills happen due to boat accidents and the fish are all gonna die the earth was good and healthy a really long time ago and now its not healthy for people its really bad now and litter is getting everywhere and plastic is getting in the ocean and animals are getting hurt and we need to do something about it and that's r

## Reason 2

If we keep littering cause animals will die and there won't be food for everyone everyone will die cause there will be no meat or food and humans and all animals will be ectstinkenned are earth die and there will be nothing left and thats the end of reason 1

Now were are gonna talk about the trees they o have O2 in them and thats how we breath and thats running animals homes and its not cool like the birds there dieng cause there homes are being destroyed and the squirrels the live in the trees to and there homes are being chopped down and wildfires and thats the nd of reason reason 2

## Reason 3

We need to take care of the water plastic is getting in the oceans and killing and hurtin the animals and we need to stop litter hole bunch of trash is getting in the ocean and we gotta stop all the bad thing going in the ocean. That's reason 3

Conclusion thats the end of all the reasons why we should take care of the earth and thanks for reading do you think we should take care of the earth?????
