5th grade

Vermont is a very peaceful state/place, and it is my home state. I like Vermont's Environment because it's very nice in spring, summer, fall and winter along with Vermont being a very healthy state. I also like Vermont for the nature that it has, it's very green and peaceful with everything in Vermont's ecosystem. Vermont has a lot of water (ponds, lakes, rivers, etc), forests, and life. like Vermont for being beautiful, peaceful, and clean. People can help Vermont by composting and recycling. Vermont's weather is great in the summer even though it sometimes rains. Vermont has various ecosystems and biomes that house all different types of animals and plants. The maple trees in Vermont produce the best syrup, (the syrup is the best). Vermont is a very nice state because it's very pretty and well formed for a state. Vermont also has nice people who participate in green up day to clean up vermont and make it better. I like Vermont's environment because it is well shaped and relaxing in the summer. Vermont is peaceful and full of clean air along with life. I also like how Vermont is clean, because if there was no water, we would not have crops, if there were no crops, there would be no grass, and if there was no grass, there would be no healthy cows/animals. Vermont is a nice state and houses lots of wildlife and nature in it. I like how Vermont's lakes and ponds are very fresh and clear. I also like that in the summer it gets really hot, to the point we sweat so much. My favorite seasons are summer because we get to go swimming, go hiking, it's warm, and animals are out. Especially snakes. The snakes that live here are

cute :) Vermont summers are the best because we get lots of fresh air, flowers bloom every day, and the sky is mostly blue. Along with going fishing, we can go fishing in any season in vermont. I like to fish in the summer because we have a better chance of catching anything. In the spring and summer I mostly like to do stuff with my family. I usually go hiking with my grandma, 4-wheeling with my dad, and lots more. I feel like school is more fun in the spring & summer because it doesn't take forever to get ready for recess, and we get to do more stuff than we do in winter. (soccer, basketball, tag, etc) winter is the worst season ever >:( Fall is also cool because we get pretty leaves and lots of tourists come to Vermont just for the leaves we have. I like the red leaves.

Vermont has really fresh air too. And what i like the best about vermont in all 4 seasons is that in spring, it gets warm and snakes come out too, along with flowers starting to bloom. In summer there is swimming, lots of fun stuff to do, fishing, and hot, really hot weather. In fall there are pretty leaves, hiking, warm weather, and fishing. In winter there is ice fishing, pretty snow formations, sugar on snow (really good), and snow all over trees (mostly on branches which looks really cool). Vermont is really nice in the summer because you can go swimming. Swimming is really fun because I feel like the water is always heated by the sun. You can also go fishing, and that is my favorite thing to do. I love to catch fish and see how big they are and to take photos with them. Vermont's nature is full of animals and life (plants, animals, humans, etc). I love Vermont's environment because in summer it's always

warm and there is always green everywhere. Even when it rains. I love Vermont lots and I will grow up in vermont.
