

## THIS IS HOW I ENJOY EARTH'S ENVIRONMENT

Feedback please  
Mr.Sealey's Class

### INTRODUCTION

Do you like football and baseball because those are some of my favorite sports and this is how I like to enjoy playing outside in Vermont.

### BASEBALL

Well if you like baseball then you will like this section!Baseball starts in spring, when I'm at baseball practice it's pretty hot when you're running around and throwing and hitting the ball. When it rains in baseball season I don't like when the ball gets wet and the dirt gets wet. I also like to play my friends on the other majors team and we os to them because they are a really good team they went Undefeated.

### FOOTBALL

If you like football then you will like this section!Football starts in the fall, My favorite part about football is running the ball and tackle that's my favorite part you might have a different opinion about football. Another reason is being on a team with my friends and also practicing with my friends and team. Another reason is games I love when I go to my games and also have a great game to and if I lose a game I am kinda disappointed but its fine I also like to win games it feels awesome and it's exciting. Also I was sad when it was my last game but also I was playing against my friend Sully and we lost by one touchdown! But when you're playing it looks cool with your helmet on and you can see your face mask. These were my favorite sports in the summer and spring time.

### PLAYING WITH MY FRIENDS

In the summer I love to play with my friends in the summer we like to play neighborhood tag its where 2 people are tagging and a couple people are hiding like 6 people. And if you get tagged you are it for the next round. I also like t go swimming with my friends in my pool or there pool. Also when me Garrett Ben are outside we play whiffle ball and it's fun but it's really hot. Sometimes we have to stop in the middle of the game because how hot it is.

## CONCLUSION

These are all the reasons I love the outdoors. I hope you like the outdoors more! This is how I enjoy earth's environment with my friends to. And playing sports.

Playing with my friends, football, baseball
