What I love about vermont.

What I love about Vermont is that it has a mix of all seasons spring ,summer, fall and winter. If you live in Vermont you'll get a taste of all other than california where its always hot. Some of my favorite things to do in Vermont are Ski, Mountain bike and play soccer. Some seasons can be unpredictable. Such as winter it could be -20 out then the next day its very warm and vero snow.

So it can be hard to plan things out but most days are very nice. In the summer It is always warm and nice out. I prefer to hang with my friends outside when its nice out in the summer. In my opinion spring is the hardest season because it is always muddy and wet. So it limits what you can do outside. There is a social environment I love about Vermont as well, I find everyone nice and helpful. This is why I love to live in vermont and hopefully always will love vermont, great mountains, fun swimming areas and there awesome people. During the summer me and my friends will make fresh lemonade during the hot days. During the winter days I make hot chocolate with marsh mellowes. The school environment is very chill and fun. I enjoy seeing friends at school and playing mini pickup soccer games. These little things make vermont super fun. I hope you Visit vermont one day.
